Securing Global Online Transactions

David Isaac | lightcomputerstechnology@gmail.com

The Problem

The Problem

Online buyers and sellers face trust issues, fraud, and payment failures.
Emerging markets are especially vulnerable due to weak payment systems.
Cross-border transactions often lack transparency and buyer protection.

The Solution

The Solution

Dealcross provides a secure escrow platform for digital transactions.

Funds are held safely until both parties confirm satisfaction.

Supports files, milestones, and dispute resolution built-in.

Market Opportunity

Market Opportunity

Over \$5 billion in digital services traded monthly online.

Freelancers, e-commerce, and P2P services are expanding globally.

Africa and LATAM have untapped markets needing secure platforms.

How It Works

How It Works

1. Buyer and seller create a deal and fund escrow.
2. Seller delivers product or service.
3. Buyer confirms delivery and funds are released.
4. Disputes can be resolved by support if needed.

Key Features

Key Features

- Secure wallet and escrow system
- File or statement delivery tracking
- Dispute resolution tools
